2005

MERCURY

DISCOVER THE VIEW IN MERCURY SABLE FOR 2005. A spacious and flexible interior environment. Seating for up to 6 people. The way some manufacturers talk, you'd think these were new ideas. In Mercury Sable, these "discoveries" have already been perfected. So we've focused our energy on infusing Sable and the expanding lineup of Mercury vehicles with innovative technology, progressive style, modern design cues and eye-catching details. Clearly, the time to discover Mercury is now.

Above: Sable LS interior shown in Medium Graphite with available LS Premium Package. Shown on cover: Sable LS Sedan in Silver Frost Metallic.

Interior Design Wherever you look, you'll discover rewards that elevate Mercury Sable into a league of its own. Triple-sealed doors help keep road noise at bay. Rear-floor heat ducts maintain comfort throughout the cabin. Leather-trimmed seats are available on all models, accented by a standard wood- and leather-trimmed steering wheel and faux-wood shift knob on Sable LS (shown). Even 6-passenger seating, a rarity in its class, is standard on Sable GS. The 6-passenger configuration features a unique front-row flip-fold center console that opens to reveal dual cupholders, a tray for sunglasses and a generous storage bin. Plus, you've got a padded armrest to enhance your comfort while driving. Mercury Sable has also been recognized by Polk for having the Highest Model Loyalty in the Midsize Car Category.* With all that Sable provides, it should come as no surprise.

*According to R.L. Polk statistics for the Midsize Car Category in the 2003 model year, Sable ranked highest by having the greatest percentage of households return to purchase or lease another Sable.

Best Pick in Safety Every Mercury Sable includes the Personal Safety System™ to provide enhanced protection for the driver and front passenger. Side-impact airbags (shown) are also available on all models. This emphasis on safety engineering helped the 2005 Sable earn Best Pick** honors from the Insurance Institute for Highway Safety, the 14th year in a row that the IIHS has given Mercury Sable its highest award.

All-Speed Traction Control This system inspires additional driving confidence by monitoring wheel spin, then using the engine and brakes to help a spinning drive wheel regain traction – thereby helping the driver maintain control. Available as part of the Secure Group; requires optional Anti-lock Brake System on Sable GS.

Keyless-Entry Keypad On Sable LS, just enter your personalized code and you're in. No keys required. On all Sable models, the SecuriLock® passive anti-theft system's electronically encoded ignition key is designed to help prevent the engine from being started unless a coded key programmed to your vehicle is used.

**Based on 40-mph frontal offset crash test.

GS
